

INCIDENT MANAGEMENT SITUATION REPORT
 SATURDAY SEPTEMBER 24, 1994 - 0900 MDT
 NATIONAL PREPAREDNESS LEVEL III

Current Situation: Initial attack activity decreased. Good progress was made on the California large fires while fires in Idaho continued to experience moderate activity. Some mobilization occurred through NICC, however, demobilization remains steady.

A military Chinook helicopter was involved in an on-the-ground accident yesterday on the Corral Creek fire. One military crewmember was fatality injured and four others received minor injuries.

North Zone - California Large Fires:

BARKLEY, Lassen NF. A Type II Incident Management Team (Madden) is assigned. Efforts are directed at finishing control lines and burning out. Timber workers are assisting suppression crews in building both primary and secondary lines.

SPECIMEN, Klamath NF. A Type II Incident Management Team (Phenix) is assigned. The fire increased by 500 acres yesterday, spreading towards the Salmon River to the southeast. Fire behavior moderated, allowing crews to make good progress.

MAD, Six Rivers NF. The fire size has been adjusted to 85 acres. It will be dropped from this report, unless significant activity occurs.

SHF = Shasta-Trinity NF

Eastern Great Basin Area Large Fires:

THUNDERBOLT, Boise NF. A Type II Incident Management Team (Martin) is assigned. Torching and crowning increased, with numerous hot spots requiring action. Transition to another Type II Team will occur today.

CORRAL CREEK/BLACKWELL COMPLEX, Payette NF. A Type I Incident Management Team (Wands) is assigned. Fire activity increased again in the Marshall mining area and is causing concern. Drying fuels are causing increased fire activity within the perimeters of both fires. Ground fires and torching occurred in dense spruce stands throughout the complex.

CHICKEN COMPLEX, Payette NF. An inversion in place over the fire limited activity to the north and south ends.

INCIDENT NAME	UNIT	ST	SIZE	% CTN	EST CTN	TOTAL PERS	CRW	ENG	HELI	STRUC LOST	EST\$ LOSS	EST COST

Alaska Incidents:

KOYUKUK FLOOD, Alaska State. A Type I Incident Management Team (Johnson) is assigned. The support operation in Fairbanks is receiving and distributing supplies to the areas affected by the flood. Basic phone, medical and water services were restored in Allakaket. Building reconstruction, cleaning, debris removal and woodcutting continue in Hughes and Allakaket. Highway and bridge reconstruction are underway.

Outlook: A RED FLAG WATCH is posted in southern Oregon for dry lightning. An upper level low pressure system off the central California coast will push moisture across California and into southwestern Oregon, producing a few thunderstorms. Since the lower levels of the atmosphere are very dry, any thunderstorms will likely be dry. A little subtropical moisture has moved into extreme southern Arizona, giving this area a slight chance of thunderstorms as well. The rest of the western U.S. will be sunny and warm under a ridge of high pressure. Highs will be up to 105 in the southwestern deserts and in the mid 70's to mid 90's elsewhere. Fire activity is expected to continue on large fires as warm, dry conditions prevail.
